

# Remote Power Panel (RPP)

Anord Mardix RPP delivers safe, local power distribution directly to server racks in data centres. Installed at the end of a row or on an adjacent wall, it provides highly reliable, individually protected feeds to server cabinet.

## KEY FEATURES

- Meets UL67 and UL508A standards for North American data halls
- Custom size options with footprints as small as 20 × 8 inch
- Up to 168 protected branch circuits
- Flexible cable entry from top or bottom entry/exit for installation versatility
- Factory integrated MCMS circuit monitoring available as standard protocol that provides branch-level measurement, alarms, and trends for capacity planning
- Custom monitoring option available to meet client specifications for real-time visibility via open-source protocols
- Robust welded frame design
- Door-in-door hinged dead front for safe operation
- Free-standing or wall-mounted for installation flexibility
- Zero air-gap requirement for back-to-back or side-to-side mounting saves floor space

### Optimized white-space usage

Compact footprints enable higher rack density

### Actionable power data

Custom Integrated monitoring supports capacity planning and energy optimization

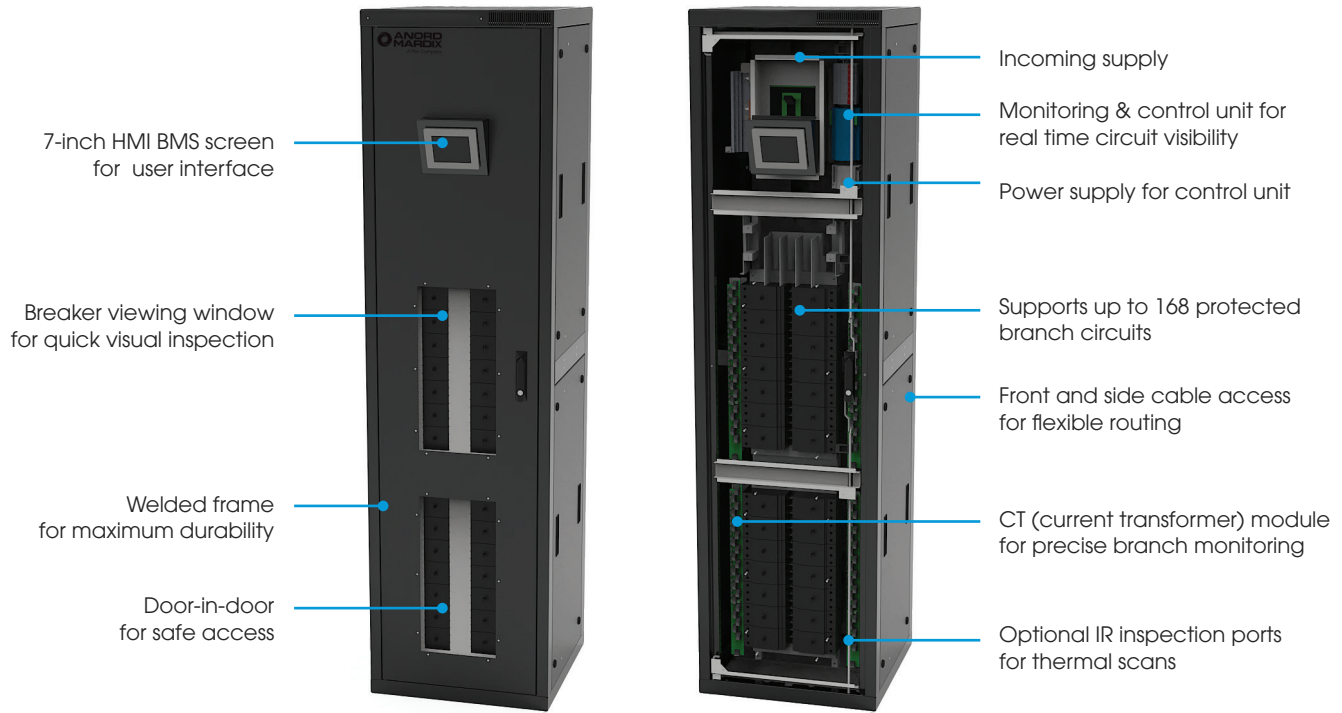

### Future-ready flexibility

Multiple sizes and input options allow easy expansion and upgrades

### Simplified deployment

Zero air-gap requirement saves floor space

Item	Technical Specifications
Number circuits	72/ 84 / 168 branch circuits
Rated voltage	208Y/120 V, 415Y/240 V, 480Y/277 V
Rated current	Up to 600 A
Rated frequency	60 Hz
Cable access	Front, Side
Cable entry/ exit	Top or Bottom
Ingress protection	NEMA 1
Dimensions	20"x8"x57" (up to 72 branch circuits) 24"x12"x88" (up to 84 branch circuits) 24"x24"x88" (up to 168 branch circuits)
Certifications	UL67, UL508A
Monitoring protocol	Modbus RTU, Modbus TCP/IP, HTML, SNMP v2, BACnet IP, REST API
